## How To Configure Browser For Proxy (Internet Explorer)

This document shows how to configure your browser to access internet with the implementation of the proxy server. If there are already some settings, kindly copy the details so that you can switch back later when you are in different network – for example, your personal broadband at home.

1. Launch your browser, click on "Tools" and "Internet Options". The following will be shown:

Internet Options	×		
General Security Privacy Content Connections Programs Advance	ed		
Home page You can change which page to use for your home page. Address: http://www.greate-advisor.com.sg/			
Use <u>D</u> urrent Use <u>D</u> efault Use <u>B</u> lank			
Temporary Internet files         Pages you view on the Internet are stored in a special folder for quick viewing later.         Delete Cookjes         Delete Eiles			
History          History       The History folder contains links to pages you've visited, for quick access to recently viewed pages.         Days to keep pages in history:       0 📑 Clear History			
Colors Fonts Languages Accessibility	1		
OK Cancel Apply			

Note that your homepage address may be different.

2. 0	Click on	"Connections"	tab, then	"LAN	Settings" but	ton.
------	----------	---------------	-----------	------	---------------	------

Internet Options	<u>? ×</u>
General Security Privacy Content Connections	Programs Advanced
To set up an Internet connection, click Setup.	Set <u>up</u>
Dial-up and Virtual Private Network settings	
	A <u>d</u> d
	<u>R</u> emove
Choose Settings if you need to configure a proxy server for a connection.	<u>S</u> ettings
Never dial a <u>c</u> onnection	
C Dial whenever a network connection is not preserved	nt
C Always dial my default connection	
Current default: None	Set Default
Local Area Network (LAN) settings LAN Settings do not apply to dial-up connections. Choose Settings above for dial-up settings.	LAN Settings]
OK Cano	el <u>Apply</u>

3. Ensure the settings are the same as follow:

Local Area Network (LAN) Settings	×			
Automatic configuration Automatic configuration may override manual settings. To ensure the use of manual settings, disable automatic configuration.	]			
Automatically detect settings				
Use automatic configuration <u>s</u> cript				
Add <u>r</u> ess				
Proxy server	7			
$\label{eq:linear} \begin{gathered} \blacksquare $$ Use a proxy server for your LAN (These settings will not apply to dial-up or VPN connections). $$$				
Address: proxy.greate-ar Port: 8888 Advanced				
Bypass proxy server for local addresses				
OK Cancel				

Check the option box as shown above.

Enter "proxy.greate-advisor.com.sg" without quotes in the "Address" text box and "Port" number as 8888.

4. Click on the "Advanced..." button.

## 5. The following will be shown:

	Туре	Proxy address to use	Port		
	HTTP:	proxy.greate-advisor.com.s(	: 8888		
	<u>S</u> ecure:	proxy.greate-advisor.com.s(	: 8888		
	ETP:	proxy.greate-advisor.com.s(	: 8888		
	<u>G</u> opher:	proxy.greate-advisor.com.s(	: 8888		
	So <u>c</u> ks:		:		
Exceptio	I v Use the same proxy server for all protocols ns Do not use proxy server for addresses beginning with:				
	localhost;	*.greate-advisor.com.sg	2		

In the "HTTP" text box, enter "proxy.greate-advisor.com.sg" without quotes and "Port" as 8888 as shown above (it may already be completed, if so, ensure it's the same as you entered in step 3)

Check the "Use the same proxy server for all protocols" box. The "Secure", "FTP", "Gopher" text boxes will be automatically be filled with text and grey out. The "Socks" text box will be grey out also.

In the "Exceptions" text box, enter the wordings "localhost;\*.greate-advisor.com.sg" without quotes.

- 6. Click "Okay" button a few times to return to your browser.
- 7. Close your browser. Then re-launch your browser.

8. Now when you visit external websites, a prompt will appear as shown:

Enter Netw	vork Passwor	d	? ×	
<b>?</b> >	Please type your user name and password.			
2	Firewall:	proxy.greate-advisor.com.sg		
	Realm	Great_E-Advisor		
	<u>U</u> ser Name			
	<u>P</u> assword			
	□ <u>S</u> ave this p	password in your password list		
		OK Can	icel	

Enter your proxy id and password and click "Okay". The website you are visiting will then show up. Note that you may need to press the "F5" key to refresh the page.

Note that id and password are case-sensitive.
